

Executive Beechcraft inc.

TOPPS PRODUCTS INC.

Attn: Arlan Koppel

Storing and maintaining aircraft allows for no mistakes. Aviation is Executive Beechcrafts' business and in this industry we need to get things right, the first time. There is no room for errors.

This demand for quality in performance applies to our building maintenance too. We cannot allow their condition, in particular leaking roofs, to interfere with, or interrupt the maintenance of the aircraft in our hangars.

So, on our metal roofs we specify TOPPS SEAL SYSTEMS 1000. TOPPS gets the job done just the way we want it. Efficiently with no interruptions to the work taking place beneath, and it's right the first time, every time.

This summer we completed our 5th roof, proof of our confidence that in TOPPS we have a liquid rubber roofing system which attains the high standards we set. We have no hesitation in recommending TOPPS to anyone in search of high quality protection and maintenance of their metal roofs.

 Sincerely,

Gene May
Maintenance Manager
