

## RAP™

**COLOR:** Milky white

**BASIC USES:** Primes and conditions rusts for coating with waterborne Topps Seal®

**PRODUCT DESCRIPTION:** Dual purpose RAP Rust conditioner & primer saves both material and labor with its one-coat application that prepares rusty metal for coating with Topps Seal WB. This waterborne product chemically converts powdery rust into a more stable oxide that gets bound within a vinyl barrier as it dries and becomes the primer coat.

- FEATURES:**
- Halts rust
  - Safe and easy to use
  - A one-coat labor saving process

**DIRECTIONS** Wire brush to remove heavy or loose rust. Power wash the roof clean. Apply RAP immediately after dry by pump-up sprayer, long handled roofing brush or roller, working it in for maximum absorption. RAP contains special penetrating agents to permeate and saturate rust. "Working it in" helps get best results.

**WET MATERIAL**

*Typical Product Characteristics:*

Viscosity	Water thin
Weight per gallon	9 - 10 lb.
Solids	10% min.
VOC	0
Dry to touch @ 77° F (50% rel. humidity)	1 hr.
Coverage Rate	200 ft <sup>2</sup> per gallon applied only to rusty areas
